

DEKO FG NATURE

FULLY GLAZED
PARTITION WITH
SLIM HARDWOOD
PROFILES

Like DEKO FG, DEKO FG Nature follows the same minimal design features with the enhancement of hardwood profiles and door frames. DEKO FG Nature comprises a single glazed, full height panel finished with slim, hardwood profiles at all interfaces with the existing interior creating a high performance, but sensitive addition to the modern interior.

PROPERTIES

- Standard sizes and individual glazed modules
- Specially designed, slim, timber edge profiles
- A wide choice of glass types
- Safety glass
- Specially designed, high performance timber door frames
- A selection of door types with sound classifications, designs and sizes
- Applied graphics available
- Easy to maintain
- Fully demountable and reusable
- FSC sustainable timber profiles
- Prefabricated

SEVERAL GLASS OPTIONS

Glass thickness and type can be adapted as required, for example, in relation to partition height, safety or sound reduction requirements – all installed in the same, slim hardwood profile structure.

MINIMAL, VERTICAL JOINT

The joint between the glazed panels is achieved with a 3mm silicone strip, which provides a stable, soundproof partition with an almost invisible, pre-fabricated, clear joint.

SLIM HARDWOOD PROFILES

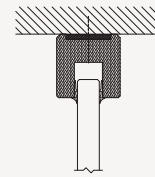

The specially designed hardwood profiles maximise the flow of light through the partition. All visible hardwood profiles are delivered as standard in oak with a powder coated surface.
